

SAFETY CRITICAL & DEMANDING
ENGINEERING SOLUTIONS

FACT SHEET: CROWLE SITE

Founded in 1966, Crowle Wharf Engineers Ltd (CWE) provides innovative engineering solutions to the rail industry.

Accreditations and Inspection

CWE is registered to BSI ISO9001:2008 and working towards the 2015 standard. Coded welders to EN9606-1 & ISO 15614-1 Part 1 & ASME 1X. BS EN 1090-1 Ex 2 CE Marking.

Magnetic Particle Inspection PCN Level 2 & ASNT Level 2.

Bogie Repairs

- Work to customer supplied processes and specifications.
- Work in partnership with customer, when specs not available, to devise repairs:
 - Processes for bogie frame repair machining.
 - Processes for bogie frame weld repair and machining.
- Appropriate tooling and jigs designed and manufactured in house.
- Faro arm validation of work done.

Parts Supply

- Over 350 parts on file.
- Able to work from drawings and specification.
- Able to reverse engineer parts when needed.
- Supply contracts available to support programed work.
- Parts & units provided to support C4, C6 or PRM programmes.
- Not only able to supply parts, can also support fitment on site.
- CWE produce parts in house to support site work teams.
- Support costs down exercises.
- Support product/design improvements.
